Fabrication

Divestekno Anugrah believed that to work safely is for our employees to maintain good health. We have programs which promote health to our employees. We have business tie-ups with medical centers for medical services and annual medical check-ups to our employees. Aside from that, we have safety management programs aligned to promote health such as providing our employees good accommodation / workplace by conducting water sample analysis for drinking water, pest control, water tank cleaning and many more.

To achieve a workplace where no one gets hurt, everyone goes home safe & well and the environment is preserved in the successful operation of our business. The primary core value of Divestekno Anugrah is Health & Safety and this is emphasized in every project that we undertake. The Health & Safety of our employees takes priority over any other business objective. To reinforce this primary core value, we implement our Habits of Highly Effective Health & Safety Leaders on all projects.

Divestekno Anugrah recognized that people are the most important assets of a business. In line with these, Divestekno Anugrah has formed a Safety Department consists of competent and qualified Safety Officers who will guide the employees to have a safe working place. We make sure that its employees undergo necessary trainings in order to perform their duties in a right and safe manner
